

Night Cream Inc.

Have you ever experienced discoloration, age spots, dark circles, wrinkles and fine lines across different areas of your face? As we begin to age, the minimal features of skin start to show in a more pronounced way. The truth is, it's inevitable to avoid and we all will experience this at some point in our lives. It is said that noticeable signs of aging start around your early 30s and worsen as time goes on. While some people have more distinctive signs of aging, there are ways to treat this before it becomes obvious. Using our Night Cream will make your overall skin appearance look and feel youthful, healthy, and fresh!

With our Night Cream, the results are scientifically proven to show immediate results within just one night of use. Night Cream has a newly designed formula that consists of many different ingredients such as ***collagen, antioxidants, retinol, alpha lipoic acid*** and ***coenzyme Q-10 (CoQ-10)***.

Each ingredient serves a major role in the rejuvenation and healing process of skin aging and damage. Here is a list of what each key ingredient does and how it works effectively in this product.

- **Collagen** is a protein that is produced in various parts of our bodies, and is a key ingredient used in anti-aging. The benefits of introducing this in our product is that it will begin the repairing process of skin cells and tissue in your problem areas. In addition, its added benefits are skin elasticity, smoothness, and complexion evenness.
- **Antioxidants** are often found in fruits, but also our own bodies. They are compounds used in the prevention of oxidation, which are related to cell damage. One of our key compounds is vitamin C. This active ingredient boosts the healing of damaged cells so they can rebuild and repair at a faster rate!
- **Retinol** is a compound that sources from vitamin A. This compound controls puffiness, unevenness, irregular color, and helps plump the skin to give you a vibrant and fresh appearance.
- **Alpha lipoic acids** are naturally produced chemicals inside our bodies. These chemicals attack free radicals so they don't cause tissue damage. This ingredient serves to tighten pores or minimize the appearance of them, keeping the skin tight and firm.

- **Coenzyme Q-10 (CoQ-10)** is another chemical used to control free radicals. This ingredient is primarily used in our Night Cream to help crow's feet, fine lines, sun spots, and wrinkles.

With all these elements combined, we have perfected our formulas to work best for all skin types and textures, guaranteeing fast and noticeable results after the first use.

Using our Night Cream at night ensures that your body is absorbing the cream, allowing it to settle in and do what it's intended for. When your body is at rest, you are in your own natural healing state. Your body is charging and replenishing itself. During this process, the cream activates and works fast with your body to accelerate the rejuvenation process.

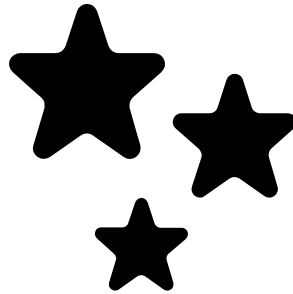

After using our Night Cream, you should notice an overall change in your skin in the first week. Your skin should start to feel softer and supple. Your fine lines should be fainter and more unnoticeable. As you continue to use our product, you should see improvements daily.

For best results, we also recommend that you try our ***Night Cream Face Serum*** with our Night Cream.

Our face serum is a vitamin enriched treatment that is applied to your face at night before you apply your Night Cream. This helps to warm your face and activate circulation. In addition, it is also great for soothing the skin and moisturizing!
